Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit:

Claim Rejection under 35 USC 112, 2nd paragraph

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 12,13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 12 and 13 are rejected because claims are directed to Examples. A claim must be complete and stand without reference to an Example.

Claim Rejections under 35 U.S.C. 102(b)

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3,10,14,16,18-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Rouchaud et al (Bulletin of Environmental Contamination and Toxicology, 1998, vol. 60 no. 4, pp. 577-84) or Viviani et al (Pesticide Biochemistry and Physiology, 1998, vol. 62 no. 2 pp. 125-134). Rouchaud or Viviani teaches a method of applying isoxaflutole (herbicide) to soil. It is well known in the art that herbicides control weeds. See abstract.

Art Unit:

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saunders et al (Book of Abstracts, 215th ACS National Meeting, March 29-April 2 (1998), AGRO-071).

Saunders teaches a method of applying isoxaben to soil surface. It is well known in the art that herbicides control weeds. See abstract.

Claim Rejection under 35 U.S.C. 103(a)

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-6,11,15,17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rouchaud or Viviani as applied to claims 1-3,10,14,16,18-22 above. See 102(b) rejection above. Rouchaud or Viviani teaches all that is recited in claims 4-6,11,15,17 except for the depth of the soil, amount of ingredient, and rate of release of ingredient. It would have been obvious to one having ordinary skill in the art to determine the optimum depth of soil for application of

Art Unit:

ingredient. One would have been motivated to do this in order to get the maximum control of weed growth in soil. With respect to delayed release or rate of release, the term is relative. Optimum amounts of ingredients would have been determined through routine experimentation.

Claim Objection

Claims 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or suggest the instant invention comprising the encapsulation of an isoxazole compound.

Telephonic Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alton Pryor whose telephone number is (703) 308-4691. The examiner can normally be reached on Monday through Friday from 8:00 a.m. to 4:30 p.m.
